Nemex: Mid West Drilling Update

Wednesday, 13 Jul 2011

- Nine reconnaissance drill holes for 592m at Woodley Project, Western Australia
- Several new horizons intersected with best result of 16 metres of 54.8% Fe from 37m (60.6% Calcine Fe)
- Only 2.5km of a 20km iron formation drill tested at Woodley
- Drill testing of surface hematite iron to begin this week at Ironstone Well Project

Iron ore focused explorer Nemex Resources Limited (ASX: NXR) is pleased to announce that it has received all x-ray fluorescence spectrometry (XRF) results from drilling nine RC holes over two prospects at its 100%-owned Woodley Project in the mid west of Western Australia.

Mining returns to Britain

Wednesday , 13 Jul 2011

Rising commodity prices have investors beginning to rethink Britain's once lucrative mining sector, but a number of challenges present themselves including local opposition and the need to secure financial backing
